Paul C. Erwin, MD, DrPH - Dean and Professor, UAB School of Public Health

Table Talk

How does history influence...

What can we learn from the past to improve the present?

How have cultural attitudes towards health and illness evolved over time, and

what role do these attitudes play in shaping health care practices and our lives?

What can I do?

Lunch catered by Blue Seas (Sponsored by UAB Public Health)

Expert Panel: A Picture of Macon County

Dr. Deane Moxley - [Name] and [Name]

Mr. Guy Trahan - Macon Community Ministers' Office Food Pantry

Ms. Angel Walker - Macon Russell Community Act...

Closing Remarks

The Purpose

Community engagement and experiential learning activities in the public health curriculum are intended to provide students with learning opportunities that allow them to experience the diversity of the state of Alabama. Students immerse themselves in the current and future opportunities for health.

Our students are encouraged to examine health disparities and inequities in a local context. In this way students cultivate an appreciation for the diverse communities in Alabama which is necessary for successful leadership.

SPECIAL THANKS TO THE PROGRAM COORDINATORS
